

PHASE 1

Requirement Analysis & Planning

1. Objective

Analyze the Employee Laptop Request process and define the business requirements, user roles, request fields, approval levels, fulfillment expectations and automation plan.

2. Business Objective

Implement a centralized and controlled ServiceNow solution for managing employee laptop requests and replace manual email/verbal requests with a standardized digital process.

3. Business Goals

Provide a single platform for employees to request laptops.

Differentiate requests as Basic or Advance.

Prevent duplicate requests by the same employee within a calendar year.

Improve visibility and tracking for IT and management.

Ensure approval status tracking and accountability.

4. Functional Scope

Employee can submit a Laptop Request Form.

Request captures employee and request-related details.

Request Type: Basic / Advance.

Status: Pending Approval / Approved / Rejected.

Reason is captured for justification.

One request per employee per year is enforced.

5. Request Fields

6. Record Producer Plan

The Record Producer acts as the front-end entry point for employees. It inserts data into the Laptop Request Form table while backend validations, approvals and role-based security are applied automatically.

7. Stakeholder Mapping

Field	Type	Description
Number	Auto Number	Unique request identifier
Requester	Reference – User	Employee submitting request
Employee Email	Email / String	Requester contact email
Request Date	Date/Time	Submission date and time
Short Description	String	Brief request summary
Manager	Reference – User	Approving manager

Field	Type	Description
Type of Request	Choice	Basic / Advance
Status	Choice	Pending Approval / Approved / Rejected
Reason	Choice	Software Development / Personal Use / Other

Stakeholder	Responsibility
Employee	Submit and track laptop request
Manager	Approve or reject request
IT Team	Fulfill approved request
Administrator	Configure, secure and maintain application
